Software Engineer

A polyglot developer deeply interested in high performance, software architecture and solving complex problems. Dedicated to writing highly maintainable and reliable code while following best practices. Familiar with all stages of applications development process, from requirements gathering, analysis, and design to the development, deployment, and support of the solution. Proven ability to work as part of a team (remote or on-site). Currently, teaching is my passion.

Particularly specialized for:

Android, Java, Kotlin, Swift, JavaScript, Node.js, React, Obj-C

Experience
