Software developer

As a developer I'm dedicated to write highly maintainable and reliable code while following best coding practices. Familiar with all stages of applications development process, from strategy through requirements gathering, analysis and design to the development, deployment and support of the solution. Highly passionate about new technology, Design Patterns, TDD. Trained to develop software using Agile Scrum software development methodology. Good problem solver, always willing to learn new skills and practices in area of programming and IT. Very good communication skills, teamwork capabilities and work ethics. Proven ability to work as part of a team, as a team leader or on own initiative as required.

Particularly specialized for:

Android SDK, Java, Node.js, Objective-C, Swift, JSON, Mac, Linux
